## JAG and MECO Two strong partners - one mission: highest quality and reliability

JAG is an official service partner of  
MECO in Switzerland!

We now offer first-class service and maintenance for MECO systems directly on site in Switzerland. With MECO's technical know-how and JAG's many years of experience, we guarantee smooth operation and maximum efficiency of your systems.

Benefit from our professional customer service and customized solutions for maximum efficiency and reliability.

Whether pharmaceuticals, biotechnology or high-tech industry - we are your regional contact for customized solutions at an international level.

Let's shape the future of water treatment together - reliably, sustainably, innovatively.

### Our strengths:

- » Qualified, locally available
- » service personnel
- » Short response times
- » Customized maintenance concepts
- » Highest system availability

## JAG company profile

Turnkey process plants  
and robotic solutions.

JAG Jakob AG, based in Brügg (BE), is a leading Swiss company in the fields of automation, plant engineering and robotics. For over 85 years, JAG has been developing and implementing customized solutions for demanding industrial applications - from the planning and construction of complete systems to process automation and the integration of modern robot technology. With an interdisciplinary team of engineers, software developers and technicians, JAG combines in-depth expertise with innovative technologies. Whether for the pharmaceutical, food or mechanical engineering industries - JAG stands for quality, flexibility and future-proof „Swiss Made“ solutions. With its own automation platform, many years of project experience and comprehensive services, JAG supports its customers throughout the entire system life cycle - reliably and in a spirit of partnership.

### Your advantages at a glance:

- » **A leader in automation, plant engineering and robotics - for over 85 years**
- » **Customized solutions for pharmaceuticals, food & mechanical engineering**
- » **Interdisciplinary team & own automation platform**
- » **Support throughout the entire system life cycle - Swiss Made**

## MECO company profile

### Pure water for highest demands

Founded in 1928, MECO has established itself as a global leader in the development and manufacture of state-of-the-art water treatment systems. The company specializes in the production of high purity water for demanding industries such as pharmaceuticals, biotechnology and life sciences. Headquartered in the United States and part of the Grundfos Group, MECO offers extensive expertise in the design and supply of customized water treatment systems.

MECO supplies advanced systems for purified water (PW), water for injection (WFI), pure steam and pretreatment solutions. As a trusted partner of leading pharmaceutical companies, MECO has installed thousands of systems worldwide. Thanks to its technical expertise, MECO's systems meet - and often exceed - the highest industry standards such as USP, EP, JP, CP, cGMP and FDA.

#### Your advantages at a glance:

- » **Comprehensive portfolio for the production of ultra-pure media in the pharmaceutical and biopharmaceutical industry**
- » **Many years of expertise in the planning and implementation of ultra-pure media systems**
- » **Individual system solutions - on request as complete turnkey projects (turnkey)**
- » **Local service locations for fast and reliable on-site support**

The image shows a large industrial water injection system. In the foreground, a grey control cabinet is prominently displayed. The cabinet has the 'MECO' logo and 'A GRUNDFOS COMPANY' text. Above the logo, it says 'MASTERpak ULTRA WATER FOR INJECTION'. To the right of the cabinet, a complex network of white pipes and valves is visible, including several large vertical pipes and various fittings. In the background, there are more industrial structures, including a large blue tank and metal walkways with railings. The overall scene is a well-lit industrial facility.
